

I would like to write in support of low-power fm radio stations. I live in a community which has recieved an uplifting and empowering voice on the airwaves. WSCA fm 106.1 LP provides diverse and local programming, which compliments the community activism and spirit found in the New Hampshire seacoast. So many of the answers to our difficult social problems will be solved by local civic activism which helps build pride in a community. I encourage the expansion of low-power fm radio stations like this, so that other volunteer- based stations can make contributions to their community, heighten media diversity, and achieve objectives beyond our imagination.

Thank you for your time, David Moore, 461 Middle Road, Apt. 2, Portsmouth, NH 03801
